### THE LABOUR FORCE, VICTORIA, JANUARY 1987

#### INQUIRIES

Inquiries concerning these statistics may be made by telephoning Information Services (Labour force statistics) on Melbourne (03) 653 0181; for advice on the interpretation of these statistics contact Vince Lazzaro on Melbourne (03) 62 1846.

#### MAIN FEATURES

In January 1987 there were an estimated 2,001,500 persons in the labour force in Victoria of whom 1,859,500 were employed and 142,000 unemployed, compared with an estimated 1,246,700 persons aged 15 and over who were not in the labour force. The labour force participation rate was 61.6 per cent for persons, 75.6 per cent for males, and 48.2 per cent for females.

Victoria's unemployment rate was 7.1 per cent for January 1987. The unemployment rate for Australia for the same period was 8.9 per cent and for Victoria 12 months previously (January 1986) was 6.8 per cent. In January 1987 Victoria's unemployment rate was 6.6 per cent for males and 7.9 per cent for females.

The median duration of unemployment in Victoria for January 1987 was 13.0 weeks for persons, 15.0 weeks for males, and 8.0 weeks for females.

#### UNEMPLOYMENT RATES, VICTORIA AND AUSTRALIA

## EXPLANATORY NOTES

### Introduction

This publication contains Victorian labour force estimates derived from the Monthly Population Survey conducted throughout Australia by the Australian Bureau of Statistics. Labour force estimates for employed persons classified by industry and occupation are available quarterly (i.e. each February, May, August, and November) in *The Labour Force, Victorian Regions* (6202.2).

2. Commencing with the April 1986 labour force survey, the definition of employment has been extended to include all persons who worked without pay for one hour or more in a family business or on a farm (i.e. unpaid family helpers). This results from changes to international standard definitions by the International Labour Organisation (ILO). Previously, such persons who worked 1 to 14 hours or who had such a job but were not at work were defined as either unemployed or not in the labour force, depending on whether they were actively looking for work. The changes in definition have resulted in employment for March 1986 increasing by 8,300. More details about this change, together with other changes made to the questionnaire, are contained in *The Labour Force, Australia, April 1986* (6203.0) and in an information paper *Questionnaires used in the Labour Force Survey* (6232.0).

### Conduct of the ABS Monthly Population Survey

3. The survey is based on a multi-stage area sample of private dwellings (houses, flats, etc.) and non-private dwellings (hotels, motels, etc.) and covers about one-half of one per cent of the Victorian population.

### Scope of survey

4. All persons aged 15 years and over are included in the survey except:

- (a) members of the permanent defence forces;
- (b) certain diplomatic personnel of overseas governments;
- (c) overseas visitors holidaying in Australia; and
- (d) members of non-Australian defence forces (and their dependants) stationed in Australia.

### Definitions

5. The labour force category to which a person is assigned depends on his or her actual activity (i.e. whether working, looking for work, etc.) during the survey week. The definitions conform closely to the standard definitions recommended by the ILO. *Employed persons* comprise all those aged 15 years and over who, during the survey week:

- (b) worked for one hour or more without pay in a family business or on a farm (i.e. unpaid family helper); or
- (c) were employees who had a job but were not at work and were:
  - (i) on paid leave;
  - (ii) on leave without pay for less than four weeks up to the end of the survey week;
  - (iii) stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks, up to the end of the survey week;
  - (iv) on strike or locked out;
  - (v) on workers' compensation and expected to be returning to their job; or
  - (vi) receiving wages or salary while undertaking full-time study; or
- (d) were employers, self-employed persons or unpaid family helpers who had a job, business, or farm, but were not at work.

*Unemployed persons* are those aged 15 years and over who were not employed during the survey week and:

- (a) had actively looked for full-time or part-time work at any time in the four weeks up to the end of the survey week and were:
  - (i) available for work in the survey week, or would have been available except for temporary illness (i.e. lasting for less than four weeks); or
  - (ii) waiting to start a new job within four weeks from the end of the survey week and would have started in the survey week if the job had been available then; or
- (b) were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the survey week (including the whole survey week) for reasons other than bad weather or plant breakdown.

The *labour force* comprises all persons who, during the survey week, were employed or unemployed, as defined above.

The *unemployment rate* is the number of unemployed in each group as a percentage of the labour force in the same group.

The *participation rate* is the labour force in each group as a percentage of the civilian population aged 15 years and over in the same group.

*Full-time workers* are those who usually work 35 hours a week or more and others who, although usually part-time workers, worked 35 hours or more during the survey week.

*Part-time workers* are those who usually work less than 35 hours a week and who did so during the survey week. When recording hours of work, fractions of an hour are disregarded.

- (a) worked for one hour or more for pay, profit, commission, or payment in kind in a job or business, or on a farm (including employees, employers, and self-employed persons); or

*Persons not in the labour force* are those who, during the survey week, were not in the categories 'employed' or 'unemployed'.

*Marital status.* In the labour force survey, persons are classified as *married* (including *de facto*) or *not married*. Marital status is determined from information supplied by the respondent about the individual himself or herself and, where the person was reported as being married, about the living arrangements of persons usually resident in the household.

*A family* is defined as consisting of two or more related persons usually resident in the same household at the time of the survey. A family can contain no more than two married persons and can contain two married persons only if these persons are husband and wife.

*Hours of work.* The figures of aggregate hours and average hours refer to actual hours worked during the survey week, not hours paid for.

*Average (mean) duration of unemployment* is the duration obtained by dividing the aggregate number of weeks a group has been unemployed by the number of persons in that group.

*Median duration of unemployment* is the duration which divides unemployed persons into two equal groups, one comprising persons whose duration of unemployment is above the median, and the other, persons whose duration is below it.

#### Revision of series

6. Survey estimates are not revised for the usually small amendments of population benchmarks arising from new data on deaths and overseas and internal migration. Revisions are made, however, after each Census of Population and Housing, and when population estimation bases are reviewed.

#### Reliability of estimates

7. Since the estimates in this publication are based on information obtained from occupants of a sample of dwellings they, and the movements derived from them, may differ from the figures that would have been produced if all dwellings had been included in the survey. One measure of the likely difference is given by the standard error of an estimate. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all dwellings had been included in the survey, and about nineteen chances in twenty that the difference will be less than two standard errors. Standard errors of survey estimates and month to month movements are shown in Tables A and B at

the end of this publication. An explanation of standard errors and their use can be found in Section 4.5 of *Information Paper: Victorian Labour Force Statistics* (6262.2).

#### Related publications

8. Users may also wish to refer to the following ABS publications, which are available on request:

*The Labour Force, Australia, Preliminary* (6202.0) (monthly)

*The Labour Force, Victorian Regions* (6202.2) (quarterly)

*The Labour Force, Australia* (6203.0) (monthly)

*The Labour Force, Australia* (6204.0) (annual)

*Information Paper: Questionnaires Used In The Labour Force Survey* (6232.0)

*Information Paper: Victorian Labour Force Statistics* (6262.2)

9. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0) which is available free of charge from any ABS Office.

10. Other unpublished data from labour force surveys on aspects of the Victorian labour force are held by the Victorian Office of the ABS, and may be available on request.

#### Statistics on VIATEL

11. Selected economic, social, and population statistics are available on VIATEL \*656#.

#### Symbols and other usages

(a) Because it is not practicable to ascertain the birthplace of persons in institutions (who are classified as 'not in the labour force'), labour force participation rates for persons classified by birthplace are calculated by using population estimates which exclude those in institutions.

(b) Comprises United Kingdom and Ireland, Canada, United States of America, South Africa, and New Zealand.

DURATION OF UNEMPLOYMENT (WEEKS)						
Average (mean) duration -						
Aged 15-19 years	19.1	19.6	19.4	..	..	..
Aged 20-24 years	23.3	26.1	24.5	..	..	..
Aged 25 years and over	61.9	45.1	55.6	..	..	..
All ages	42.8	31.3	37.7	..	..	..
Median duration (b) -						
Aged 15-19 years	7.0	7.0	7.0	..	..	..
Aged 20-24 years	10.0	*	8.0	..	..	..
Aged 25 years and over	28.0	17.0	26.0	..	..	..
All ages	15.0	8.0	13.0	..	..	..

(a) Period from the time a person began looking for work, or was laid off to the end of the survey week. Periods of unemployment are recorded in complete weeks resulting in a slight understatement of duration of unemployment. (b) For information regarding the calculation of standard errors, refer to Information Paper: Victorian Labour Force Statistics (6262.2), Section 4.5
